### Note

1. Negative result does not rule out the possibility of Covid-19 infection. Presence of inhibitors, mutations & insufficient RNA specific to SARS-COV-2 can influence the test result, Kindly correlate the results with clinical findings. A negative result in a single upper respiratory tract sample does not rule out SARS-COV-2 infection Hence in such cases a repeat sample should be sent, Lower respiratory tract samples like Sputum, BAL, ET aspirate are appropriate samples especially in severe and progressive lung disease
2. COVID-19 test conducted as per kits approved by ICMR/CE- IVD/UGFDA.
3. Kindly consult referring Physician/Authorised hospitals for appropriate follow up.
4. Test conducted on Nasopharyngeal & Oropharyngeal Swabs.
- 5, The Results relate only to Specimens Tested and should be correlate clinically.
